As a beginner, I found Sprinter Pro to be intuitive and easy to pickup and make quality animations. It enabled me to make a great looking character animation for my first video game. The developer also provides easy to follow video tutorials which are detailed and made me super productive very quickly.. To sum it up, it's like 2d Toribash (With simplified movement) and more weapons.

Great fun and looks very promising.

Though, it does take a little time to learn the basics, like many games worth playing, "easy to learn, hard to master". Plus it's $3.. This easy and kind of historical point&click adventure game. I finished it almost in 2 hours.

I give 7 out of 10 .. Flashback isnt worth 5 euros at the moment. The game has bugs and glitches. Nice graphics, but the gameplay requires the player to keep shooting, not thinking.. I first played this game at Gamescom. After that i followed it for a while. The devs are very active and listen to their community. This game is perfect for chill evenings with friends. The controls are a bit tricky, but if you play it for a while you can get very good at it. I really like Tiny Tanks.
Rounds can end in 10 seconds or you can fight until the whole map is a mess.
Yeah, it's "very" early access, yeah, there are bugs. If you play with people from across the world you will encounter warping. Give the devs a little more time and this game will be a must have for every gaming night.. PLEASE HELP!!

I just purchased this Strategy Guide. I got the replays added to the game but I didn't get the "Commentary" folder added to my steam\/steamapps,common\/crimson clover\/ folder like I was supposed to.

So I don't have the 76 page strategy guide.

I'm not sure where to post this problem to get it fixed. Any help anyone??

run fast from this one. Its a zombie jigsaw puzzle game. To make it more challenging and interesting, there are zombies that you have to kill while trying to complete each puzzle. The puzzle pieces float around in a "stream" and at times it can be frustrating trying to pick up a certain puzzle piece. Its a fun game if you like puzzles. 8/10. You can't put words like Diablo or Torchlight in the description because they have NOTHING to do with This.

First time I clicked PLAY it crashed, after a reboot it's ok. (When do you need to restart PC these days!)
The hero movement is terrible, you can only walk in 8 directions instead of 360 degrees (remember Diablo 1) it's 2016!
Some skills go in the direction your character is facing instead of where your mouse is pointing.
Sounds are rediculous and cartoonish. Some will like it I guess...
You only play in small square arenas, kill all monsters and win.

Maybe in a couple of months I'll give this another go. Since then I don't recommend this game. At all. Does not work on windows 8. Please do not buy this game and waste 1 hour of your life trying to find a fix.. It was nice having an autoclicker right away but the pictures make it look like you get those spider web things in the corner by the money and stuff and I don't have that. Kinda disappointed, was the selling point for me when I saw the spider webs. So I'm kind of disappointed. But I recommend for the auto clicker.
